

Checklist

- After starting the application in Android phone, the main page will be displayed.
- The main page will have a drop-down menu which includes a list of buildings to choose from.
- The selection of drop-down menu will bring user into a new page which includes the specific bathroom information of each hall.
- After choosing a building from the building list, there will be a description about the building.
- There will be a simple map embedded which will help them find the nearest bathroom if they don't know the exact location to choose from.
- Users are able to select floors in a drop-down or list-view menu after selection of building. A simple map of the floor will be generated and users will be able to select a bathroom on that floor.
- After selection of a floor, bathrooms will be separated by listed by gender.
- Each bathroom will have expanded description of its number of sinks, number of stalls, handicap stalls, and a description and review of the bathroom.
- Each bathroom will have a star rating displayed at the top of the page.
